SECRET

- ## Double Patenting

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1 and 18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 or 14 and 2 or 5 respectively of U.S. Patent No.

Art Unit: 2734

5,253,275. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed limitations that differ from that of the patented are either covered by the patented claims or would have been obvious to one of ordinary skill in the art at the time of the invention to implement based on the teachings of the patented claims.

5. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,550,863. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed limitations that differ from that of the patented are either covered by the patented claims or would have been obvious to one of ordinary skill in the art at the time of the invention to implement based on the teachings of the patented claims.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2734

7. Claims 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Ballantyne et al.
- Ballantyne et al's distribution method (Fig. 1B) teaches the following claimed steps: "storing audio and video information" (element 32, col. 3, lines 59-61); "requesting transmission" (element 34); "sending at least a portion" (26); "receiving the sent information" (Fig. 2, 36); "buffering the received information" (38, col. 5, line 14); "playing back the buffered information" (col. 5, lines 45-48).
